EDUCBA

IT Automation Specialist
& Bash Scripting Expert

SAYONI MAZUMDAR

has successfully completed the online, non-credit Specialization

Linux Bash Scripting & Shell Programming

In this Specialization, learners gained practical skills in Linux Bash scripting and shell programming, progressing from foundational command-line concepts to advanced automation techniques. They developed expertise in creating scripts, applying control structures, handling files, processing data with Awk, and troubleshooting effectively. The program emphasized hands-on projects that simulated real-world tasks in system administration, DevOps, and IT automation, ensuring learners could apply their new skills to streamline workflows and boost productivity.

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
